

Factsheet bluesign® certification

Sympatex Technologies GmbH:

Sympatex expands bluesign® certification continuously

Declared aim: Highest possible eco-friendly production level

Sympatex keeps expanding its commitment to sustainable and ecological processes and increases the number of bluesign® approved laminates continuously. As a bluesign® system partner, the Munich-based supplier of membranes and high-tech functional materials already fulfils the strictest guidelines in regard to the protection of the environment, health and safety with more than 75 percent of its total apparel portfolio. The declared aim is to raise the complete production chain to a high and eco-friendly level. There are also plans for a continuous bluesign® certification of Sympatex Tapes.

The facts at a glance:

- bluesign® system partners fulfil the strictest guidelines in regard to the protection of the environment, health and safety
- Declared aim of Sympatex Technologies: highest eco-friendly production level for the complete production chain
- More than 75 percent of the Sympatex apparel portfolio has already been bluesign® approved
- Continuous bluesign® certification of Sympatex Tapes
