

GUARANTEED GREEN

THE SYMPATEX RECYCLABLE MEMBRANE

MISSION

We develop, produce and distribute high performance membranes, laminates, functional textiles and finished products. Together with our selected partners worldwide, we provide our customers and the end-users of our products with maximum protection and comfort in the highest quality. Our products are highly breathable, 100% water and windproof and are made with homogenous, fully recyclable membranes.

Our technologies, processes and methods are based on the principles of sustainability and environmental responsibility - in particular considering an optimal carbon footprint.

VISION

CUSTOMERS

We fulfill the demands of our customers flexibly, competently and competitively in a partner-like manner. Methodical and innovative procedures support our positive reputation with our customers.

PROFITABILITY

We achieve sustainable growth through the careful maintenance of our existing business, the acquisition of new customers in international markets and expansion into new areas of application.

We achieve high profitability through the permanent improvement of our value added chain and the careful management of company resources.

EMPLOYEES

Our employees are the best in their respective fields. Commitment, experience and mutual motivation are rewarded with recognition and appreciation. Respectful and honest association with each other has the highest priority in our daily business.

ENVIRONMENT

We anticipate the impact that all of our business decisions and actions will have on the environment and work according to the principle: Reduce, reuse, recycle.

PRODUCTS

It is our goal to supply our existing and new markets with the best products. To that end we continuously develop and optimize our product portfolio with the most innovative partners in each market segment.

BRAND

We are one of the leading European premium brands in the field of functional textiles and, through our internationally distributed materials known worldwide.
